Eli's Project was created after the founder lost his son, Eli, to suicide. Eli's unique mental health struggles leading up to his suicide, propelled his father and the founding members to create a foundation that would provide relief to others suffering in similar ways.

Since its founding in July of 2022, Eli's Project has found a unique and important presence in the local community. Our events have benefited youth and given them the opportunity to express their emotions in safe spaces. We expect a robust increase in our networks in the next 12 months.

Currently, we are working together with various agencies including collaborative fundraising with the Northern Michigan YMCA to provide camp scholarships to children who have experienced adversity. We have partnering with professional organizations to advocate for mental health resources for youth in need at a governmental level. We are also developing and implementing mental health talk groups within several local school systems.

At Eli's Project, we understand suicide in youth is a complex and multifactorial problem. We've been fortunate to partner with some amazing organizations that address youth mental health. Looking to the future, we expect to continue to strengthen these partnerships and create new ones. We look forward to being a powerful resource and advocate for a population of youth that is struggling within our society.
